ABOUT US

Priyanka Dana Udyog has been a trusted manufacturer of animal nutrition products for over 20 years. We combine modern technology, high-quality raw materials and strict quality control to produce nutritious and reliable feed for livestock.

Our strength goes beyond manufacturing. We are committed to building long-term partnerships with dealers and distributors across Nepal by ensuring consistent quality, dependable supply and professional support. Together, we aim to create sustainable growth for our partners and contribute to a stronger farming community.

BALANCE FEED - PELLET (गोटी)

स्वस्थ
पशु
बलियो
भविष्य

Gopala Balance Feed Pellet is a carefully formulated cattle feed made with natural ingredients and designed to support healthy cows and consistent milk yield. We aim to maintain 20–22% crude protein and 3–5% fat, with regular laboratory testing across our batches to monitor nutritional consistency and help minimize potential feed-quality and toxicity risks. The pellet form provides a compact, uniform feed that is easy to handle, store and feed, while helping deliver the formulated ration more consistently with every serving. For farmers looking for a convenient, clean and dependable feeding experience, Gopala Pellet combines balanced nutrition with the practical benefits of pelleting.

उत्कृष्ट प्रदर्शन।

Gaulaxmi Balance Feed Mash is formulated with the same focus on natural ingredients, balanced nutrition and cattle well-being, targeting 20–22% crude protein and 3–5% fat. Our batches are regularly monitored through laboratory testing to help maintain nutritional consistency and minimize potential feed-quality and toxicity risks. The mash form offers the same balanced nutritional foundation in a practical and economical format, making it well suited for farmers who prefer traditional feeding methods and want dependable nutrition at a lower cost. With no compromise on the core formulation, Gaulaxmi Mash provides a value-focused feeding option for everyday cattle nutrition.

HIGH PROTEIN FEED - PELLET (गोटी)

स्वस्थ
पशु
बलियो
भविष्य

Gopala High Protein Feed Pellet is specially formulated for high-performing dairy cattle with greater nutritional demands during periods of high milk production. Designed with a target of 23–26% crude protein and 4.5–6.5% fat, it provides concentrated nutrition to support sustained milk production, body condition and overall cattle well-being. Every batch is rigorously monitored and laboratory tested to help maintain nutritional consistency and product quality. The pellet form provides a compact, uniform feed that is easy to handle, store and feed, making it a convenient choice for farmers seeking dependable nutrition and consistent performance from their high-yielding cattle.
